

New Literature Information

Hidden Analytical Launches New Dissolved Species Applications Catalogue

Hidden Analytical, a leading manufacturer of mass spectrometers and plasma diagnostic tools, is pleased to announce the launch of its new dissolved species applications catalogue. The catalogue showcases Hidden's extensive range of solutions for analysing dissolved species in liquids, providing customers with a comprehensive guide to Hidden's dissolved species analysis technologies used in real-world applications.

With over 40 years of experience in the field of mass spectrometry, Hidden Analytical is at the forefront of developing innovative solutions for analysing dissolved species in liquids. From process monitoring to quality control and research and development, Hidden's dissolved species analysis solutions deliver extremely sensitive (sub ppb) and accurate results for a wide range of applications in liquid media.

The new catalogue features detailed information on Hidden's dissolved species analysis technologies, with highlighted applications being oceanic trace gas measurements, enzyme activity studies and environmental research. In-depth case studies of these applications demonstrate the performance and capabilities of Hidden's solutions in real-world applications.

"We are excited to launch our new dissolved species applications catalogue," said Dr. Dane Walker, Technical Marketing Manager at Hidden Analytical. "This catalogue showcases our extensive range of solutions for analysing dissolved species in liquids and demonstrates the wide variety of applications where our solutions have proven to be effective. We believe that this catalogue will be a valuable resource for researchers and engineers looking to implement dissolved species analysis in their work."

The catalogue is available in both digital and print formats and can be downloaded from Hidden's website. For more information about Hidden Analytical's dissolved species analysis solutions, please visit www.hidenanalytical.com.

About Hidden Analytical

Hidden Analytical is a leading manufacturer of mass spectrometers, plasma diagnostic tools, and surface analysis instruments. With over 40 years of experience in the field of mass spectrometry, Hidden Analytical has built a reputation for developing innovative technologies that deliver accurate and reliable results in a wide range of industries, including materials science, nanotechnology, and biotechnology. For more information, please visit www.hidenanalytical.com.
