

Hidden Analytical Ltd Unveils

Performance-Enhanced QGA 2.0 Gas Analyser

Hidden Analytical Ltd proudly announces the launch of the QGA 2.0, a significant evolution in gas analysis technology. This next-generation analyser outperforms its predecessor with notable enhancements in speed, precision, and functionality, setting new standards in gas analysis.

Key performance enhancements include:

- **Increased Speed:** The QGA 2.0 performs 1000 measurements per second, offering rapid analysis.
- **Advanced Precision:** Exceptional accuracy with less than 0.5% error at 1 ppm.
- **Improved Electronics:** Redesigned for enhanced functionality and easier servicing.
- **Enhanced Compatibility:** Compatible with all available inlets for versatile gas analysis.
- **Streamlined Operation:** Simplified start-up with a single button for pump down and software start.
- **Compact and Lightweight:** 42% smaller footprint and reduced weight for ease of use.

These advancements exemplify Hidden Analytical commitment to pushing the boundaries of gas analysis technology, offering researchers and industry professionals unparalleled performance and reliability.

For detailed information on the QGA 2.0's performance enhancements, please visit [Hidden Analytical Ltd's website](http://HiddenAnalytical.com) or send us an email to info@hidden.co.uk.

About Hidden Analytical

Since its inception, Hidden Analytical has remained a trailblazer in the field of mass spectrometry. With an unyielding dedication to innovation, quality, and customer satisfaction, the company continues to set industry standards, ensuring that its customers always have access to the best analytical solutions available.
